Working practices and legislation

4.1 (pt 2) Demonstrate good health and safety practice when working on film productions

How will/did you apply good health and safety practice when making your film?	Everyone will be briefed about: - Where the fire exits are - Trip hazards - Walls not to lean against - No running on set - No food or drink on set - There will be a qualified first aider on set - All hazards are dealt with when found.
Add your risk assessment and explain why this is important.	It is important because it informs everyone about all of the risks on set, the severity of each one and what to do if one of them occurs.
